VE methodology has been used since 1947 in America to assist management, architects and engineering professionals to obtain optimum value for each dollar spent. Typical savings range from 10 to 15 % for most projects. As construction professionals, we should not only acquire technical knowledge but must also develop various management skills for setting the primary goals. The seminars will deal with VM history, VM process, the concept of VM in industry, the way for a qualified VM facilitator and the international VM application.

Course fee : o HK\$ 100.00 /person for one seminar OR o HK\$ 180.00 /person for two seminars

The proposed workshop is part of the 'Enhancement of Construction Value Management Professionalism for the New Generation' project run by the Hong Kong Institute of Surveyors and the City University of Hong Kong, and funded by the Professional Services Development Assistance Scheme (PSDAS).
