

## **ORGANISER – HONG KONG INSTITUTE OF VALUE MANAGEMENT**

Today, irrespective of different backgrounds and varied heritage, we all living in very interesting and challenging times. Every community is facing unprecedented social functional demands with conflicts and continuous changes. The globalisation of trade and the transition to the information age is having a substantial impact on the paradigms that address these issues.

Hence we are always seeking new opportunities to develop skills for the enhancement of performance at both the individual and the organisation level. Value Management is a process widely used in other parts of the world to improve the effectiveness of resources, financial and personnel, spent on the creation of products or services. It is a process, not a technology, therefore it has the widest application in all aspects of business, including construction, manufacturing, transportation, natural resources and government services.

The Hong Kong Institute of Value Management (HKIVM) is a non-profit making organisation dedicated to the promotion of the Value Management process in Hong Kong. Our aims and objectives are stated as follow:-
